Bavya sri Velu

PROFESSIONAL SUMMARY

A highly motivated recent graduate with expertise in Machine Learning and Full-Stack Java development. Skilled in developing end-to-end web applications using Java technologies like Spring Boot and Hibernate, alongside front-end technologies such as HTML, CSS, and JavaScript. Experienced in applying ML algorithms for predictive modeling and automation. Eager to contribute technical skills and problem-solving abilities in a dynamic work environment.

SKILLS

Programming Languages: Java, Python

Machine Learning & AI: Keras, TensorFlow, PyTorch, Deep Learning, CNN, NLP, Reinforcement Learning

Data Science & Analytics: Pandas, NumPy, Matplotlib, Power BI, Data Visualization, Statistical Analysis

Web Development: HTML, CSS, JavaScript, Spring Boot, Hibernate

Database Management: SQL

Soft Skills: Problem-solving, Communication, Teamwork, Analytical Thinking, Adaptability

PROJECTS

Employee Management System

Jun 2024 - Jul 2024

- Built and Designed and developed a user-friendly web interface for employees and administrators using HTML, CSS, and JavaScript to ensure smooth navigation and interaction.
- Implemented secure login functionality with role-based access for Admin, HR, and Employees, using Spring Boot and MySQL for data storage and authentication.
- Automated employee attendance tracking and performance evaluation processes, providing real-time reports and data insights for efficient management.

Toxic Comment Identification

Feb 2024 - Apr 2024

- Built and deployed an algorithm to classify and filter toxic comments, enhancing user experience by reducing harmful content.
- Leveraged natural language processing (NLP) techniques to identify and categorize toxic comments in online discussions.
- Implemented data preprocessing, feature engineering, and model optimization to achieve high accuracy in distinguishing between various types of toxic language.

Plant Identification

Aug 2023 - Oct 2023

- Developed a robust plant identification system, resulting in an efficient and accurate species classification process.
- Preprocessed botanical images and trained CNN models to automate plant recognition tasks.
- Deployed solutions with a strong understanding of deep learning principles using TensorFlow or PyTorch.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

2021-2025

- Mahendra Engineering College
- GPA: 8.63

Higher Secondary

2019-2021

- Fathima Girls Higher Secondary School
- Percentage: 81.6%

CERTIFICATIONS

NPTEL Introduction to Machine Learning

EXTRACURRICULAR ACTIVITIES

- Workshop Lead at AIINOVAT Club
- Participated in Smart India Hackathon
- Participated in Kavach Hackathon
- Participated in TANCAM Women's Hackathon
